OMSI is a gem in Oregon’s rich landscape. Our reach extends from the city to the coast, from the forest to the high desert, and to our rural communities as we provide hands-on experiences that bring science learning to life for hundreds of thousands of Oregonians each year.

Whether it’s a museum exhibit, a traveling program, a camp experience, or a hands-on class, there is no better way for kids to explore ideas in a creative environment, ask questions, and learn problem solving skills. The fields of science, technology, engineering, and mathematics (STEM) come to life through OMSI exhibits and programs, igniting curiosity and risk taking—essential skills needed to face the challenges of the 21st century.

Science literacy and 21st century skills are key for our region’s future leaders. We can’t predict the jobs our children will hold, but we know building these skills now will prepare them for whatever opportunities come their way. We don’t know who our future scientists, teachers, and community leaders will be, and so we must preserve our commitment to making OMSI experiences accessible so that all of our children have the opportunity to succeed.

We have achieved many things this year in Portland and across the state. With your help, we:

• Created new bilingual exhibits and programs exploring renewable energy
• Delivered health and wellness programs in our renovated eatery, Theory
• Launched events and activities on new technologies, engineering, and inventions
• Expanded museum, school, and camp partnerships with underserved communities across the Northwest
• Began development of the new Coastal Discovery Center marine science camp in Newport, Oregon

The future is bright for OMSI. The opportunities are many and the need is great. With your help, we will continue to change lives and create a healthy, thriving Oregon. It’s an extraordinary time to be a part of OMSI. Let’s share the journey.

Nancy Stueber, President
OMS Imagines
We are connecting scientists and professionals with the public to share the science behind today’s issues, stimulate new ideas, and equip people with the knowledge to make informed choices.

OMSI’s hands-on exhibits invite people of all ages from all walks of life to experience the wonder of science and discovery. Exhibits developed, designed, and built by OMSI travel the world.

Science Pubs, OMSI After Darks, exhibits, theater programs, volunteer opportunities, and community events such as Portland Mini Maker Faire all foster lifelong learners.

OMSI prepares young people to embrace the future with a deeper understanding of science, sparking imaginations that will propel tomorrow’s innovations.

Outdoor experiences open the door to the natural world, build skills and self-confidence, and foster stewardship of our environment. Seeing, feeling, creating, and exploring connects kids to their passion and their potential.

We are connecting scientists and professionals with the public to share the science behind today’s issues, stimulate new ideas, and equip people with the knowledge to make informed choices.

OMSI offers exciting pathways for inspiration and exploration. OMSI reaches communities across Oregon and five states through school programs, summer camps, star parties, library partnerships, and fairs.
Groundbreaking partnerships deepened OMSI’s impact, like the Rosa Parks Tech Challenge which created a yearlong opportunity for students in an underserved urban community. Students at Rosa Parks Elementary learned engineering, innovation, and technology through classroom programs, activities, and demonstrations. The inclusive approach involved students, parents, and teachers, and resulted in increased understanding of engineering and technology concepts.

Energizing the way we learn and grow is OMSI’s hallmark. In 2013, we expanded key themes of Energy and Environment, Health and Wellness, and Innovation and Engineering in ways that connected with diverse communities.

Our annual Portland Mini Maker Faire showcased innovation, creativity, and resourcefulness, offering a family-friendly place for people to share their hobbies, do-it-yourself projects, and inventions ranging from robots to recycled jewelry art.

We reinvented dining and turned it into an educational experience. Our remodeled eatery, Theory, offers a daily menu of delicious food and is the hub for events that explore food science. Learning about healthy ingredients, food sources, and cooking techniques helps people make better food choices.

We added Renewable Energy/Energía Renovable, a bilingual exhibit where visitors of all ages explore energy sources and tradeoffs, and how wind, water, and the sun support our needs. We are now taking this information on the road across Oregon with mobile tabletop exhibits and classroom programs.
In 2013, we raised $209,000 for financial aid which allowed 31,000 students and their families to participate in OMSI experiences ranging from summer classes to residential camps.

Students & families awarded financial aid in 2013 by program:

- Sub-Ins: 45
- Camps: 126
- Classes: 165
- Camp-Ins: 268
- Family Science Nights: 400
- Outdoor Science School: 724
- Field Trips: 4,352
- Traveling Programs: 25,612
OMSI knows no age limit because natural curiosity and the desire for lifelong learning exists in all of us. From toddlers to grandparents, the shared experience of exploration brings people together.

With your support, families with financial need are able to participate in OMSI’s unique informal science learning environment. In the past year alone, we welcomed more than 36,000 people through our doors during $2 Days on the first Sunday of each month.

OMSI welcomes all learners. We are committed to making OMSI friendly, accessible, and meaningful to everyone who wants to participate in our programs. We listen to and include the voices of the communities we serve in planning science experiences to meet their needs.

It only takes one spark to ignite the future for a child. By securing funds to provide scholarships and offer financial aid, we are proactively investing in the potential of our youth.
Planning is well underway for the Coastal Discovery Center, the newest addition to our outdoor science camps, located in Newport, Oregon. This new facility will consolidate OMSI’s marine science camps in a beautiful stretch of coast next to a thriving education and research community.

We share the vision of philanthropist John Gray who wanted every child in Oregon to experience learning in the outdoors. His gift helped us buy the land, and we’ve launched the capital campaign and design planning that will make the vision a reality.

At the museum, we seek to surprise and delight our guests at every turn. Innovative demonstrations and programs will augment our new Renewable Energy/ Energía Renovable exhibit in OMSI’s Earth Hall.

In addition, our monthly Meet a Scientist program connects visitors with local science-based professionals who share their latest research and personal stories of science in action.

Building on the success of Theory, we will expand our Health and Wellness theme through enhanced demonstrations and programming on growing, preparing, cooking, and eating food to encourage healthy lifestyles.

OMSI’s expanding Maker activities will leverage the excitement generated by the Portland Mini Maker Faire. As a cornerstone of our Innovation and Engineering theme, programming dedicated to the art of “making” will inspire the creative thinking, problem solving, and building and testing skills necessary to turn ideas into products.
We are fortunate to have dedicated leaders working to ensure OMSI’s long-term success. Our Board of Trustees, Emeritus Board, and leaders within the museum are committed to our programmatic vitality and fiscal stability. Our appreciation for their work is best exemplified in the faces of children who discover a whole new world when they step through our doors.

JOHN GRAY
From his family to his resort guests to the beneficiaries of his philanthropy, John D. Gray wanted Oregonians to enjoy what the state and region have to offer. John’s appreciation for outdoor experiences at the coast was a key motivation for his contribution which allowed OMSI to acquire land for a year-round marine sciences camp. OMSI’s Coastal Discovery Center will become a reality because of John’s foresight, generosity, and enthusiasm for Oregon.

FRED FIELDS
Fred Fields was a dedicated advocate of science and engineering education, and served for many years as an OMSI trustee. He was fascinated by how things worked and he loved watching children light up over their own discoveries. He was particularly proud of OMSI’s exhibit shop and took delight in the ingenious ways our exhibit builders met the challenge of making interactive exhibits durable. Fred’s exceptional bequest is testimony to his dedication to lifelong learning opportunities for future generations.

Photo Courtesy of Lewis & Clark College

MARTHA AND J.W. ROSACKER
Martha and J.W. Rosacker were community leaders who believed strongly in the power of education and civic responsibility. They cared about Oregon and the protection and well-being of its children. The Rosackers’ extraordinary dedication to the community is evident in their generous bequest to OMSI which will make science learning available to more children.

J.C. STEVENS LEGACY SOCIETY
OMSI’s legacy grows because of the generous donors who include us in their future giving and estate plans. Their enduring commitment makes hands-on science learning possible for future generations.

OMSI volunteers contribute their time, knowledge, and passion in countless ways. They expand our capacity to share the wonders of science with children, enhance our programs, and streamline our operations. From June 1, 2012, to May 31, 2013, over 4,700 OMSI volunteers contributed 113,963 hours of service throughout the museum.
