For more than 65 years, OMSI has operated without state or local revenue for our ongoing operations, relying instead on our members, sponsorships from corporations, and the generous support of individuals and foundations. Though OMSI has not been immune to the effects of the weakened economy, we have weathered the storm. In this year of fiscal challenges, we have emerged a stronger, more focused organization. As always, we are managing your investment with responsibility and integrity. We remain true to our mission of bringing quality science learning experiences to people of all ages.

We are so proud that people see OMSI as a place of enduring value. Our attendance and memberships continue to grow despite a weak economy. We are also proud of our community partnerships, and being a showcase for exciting innovations in sustainability and renewable energy. Our traveling programs continue to provide a unique brand of the OMSI experience to children in rural and underserved areas, and every week our halls are filled with school groups, families, and adults participating in dynamic programs that range from Science Playground to hands-on science labs to OMSI After Dark.

This year we are hosting several featured exhibits, including the OMSI-built Design Zone: Behind the Scenes, which showcases exciting, hands-on applications of algebra, and Identity: An Exhibition of You, an exhibit about genetics and DNA. Lost Egypt: Ancient Secrets, Modern Science will unearth the hidden stories and artifacts of that intriguing and mysterious civilization. SAMSON, the magnificent 39-foot Tyrannosaurus rex fossil, continues its worldwide museum debut through December.

Thank you for your confidence in what we do. Together we can build a stronger, brighter future for everyone.

Nancy Stueber, President
**BOARD OF TRUSTEES**

OMSI’s Board of Trustees is a special group of volunteers with a passion for OMSI, our community, and science education. They bring professional expertise, advocacy skills, financial support, and boundless energy to countless projects on OMSI’s behalf.

The Board has our deepest gratitude for their contributions this past year.

**BOARD OFFICERS (FY10)**
- Steve Cox, Chair
- Curt Heininger*, Immediate Past Chair
- Judy South, Treasurer
- Jennifer Bruml, Secretary

**BOARD OFFICERS (FY11)**
- Steve Cox, Chair
- Don Vollum, Chair-elect
- Judy South, Treasurer
- Trond Ingvaldsen, Secretary

**BOARD OF TRUSTEES (CONTINUED)**
- Joyce Lynn Garrett
- Blake Hedinger
- Thomas L. Hutchinson
- Scott Kiewe
- Jon Jaqua*
- Dolores Orfanakis*
- Preston Pulliam*
- Skip Rahm
- Dan Berliger
- Joseph F. Robertson, Jr.*
- April Sanderson
- Greg Steenmeier*
- Andy Seidt
- Tom Turnbull
  * Completed term 2010

**MUSEUM STAFF**
- Nancy Stueber, President
- Paul Carlson, Senior Vice President
- Ray Vasile, VP Center for Learning Experiences
- Tim Mack, VP Finance, Human Resources, and Volunteer Services
- Mark Patel, VP Marketing, Retail, and Sales

“As an educator, I appreciate OMSI’s commitment to serve the Portland community as a resource for scientific awareness, and to helping students UNDERSTAND AND BE FASCINATED BY SCIENCE.”

Preston Pulliam
President, Portland Community College
OMSI Board Member
EXHIBIT HIGHLIGHTS

OMSI’s new fiscal year started off with a perfect blend of pop culture meeting real life science in CSI: The Experience. Visitors to the exhibit, based on the popular CBS television series, were invited to play the role of forensic scientist and help solve a crime using real world forensic techniques. From DNA and firearms analysis to forensic anthropology and toxicology, CSI: The Experience presented a one-of-a-kind, immersive, and hands-on science learning opportunity.

OMSI’s fall exhibit took a close look at one of the most common human emotions, fear. Scream: The Science of Fear took an experiential and holistic view of fear, examining the physiological, neurobiological, and sociological aspects of this misunderstood emotion.

FY10’s final exhibit, Space: A Journey to Our Future, explored the past, present, and future of space travel. The exhibit offered space exploration enthusiasts the opportunity to touch a piece of Mars, see a real Moon rock up close, take a spin on a space bike, and tour a full-scale future lunar habitat.

SOMETHING OLD AND SOMETHING NEW IN OMSI’S EARTH SCIENCE HALL

The 66-million-year-old Tyrannosaurus rex skeleton known as Samson made its worldwide museum debut in OMSI’s Earth Science Hall in late December. Samson was discovered in South Dakota in 1987 and is one of the three most complete Tyrannosaurus rex specimens in existence. Close to 60% of Samson’s original bones, including its nearly complete skull, will be on exhibit through the end of 2010.

OMSI partnered with the National Oceanic and Atmospheric Administration (NOAA) to bring an exciting new permanent exhibit to the Earth Science Hall called Science On a Sphere (SOS). Science On a Sphere uses computers and video projectors to display dynamic animated images of the Earth’s atmosphere, oceans, global warming trends, and hurricane paths, as well as the surfaces of the Sun, Mars, and Moon.

PLANETARIUM HIGHLIGHTS

The Kendall Planetarium continued to be a leader in astronomy science throughout FY10. Two new dome shows were added to its lineup: Ice Worlds and Journey to the Stars. Ice Worlds explores how the existence of ice shapes the landscape and natural systems on other planets and moons in our solar system. Journey to the Stars explores the birth, life, and death of stars, and why they are important to us.

FY10 also proved to be a banner year for planetarium astronomy events. Former “OMSI kid” and current NASA astronaut Dr. Mike Barratt sent photos to OMSI while on the International Space Station. The photos he took were shown as part of OMSI’s Starry Nights Live presentations. Dr. Barratt also took time out from his Space Station duties to speak to OMSI visitors live via satellite for a special event.

Other planetarium event highlights included a viewing of the ICROSS mission’s impact on the Moon, a speaking engagement with NASA historian Andrew Chaikin, and the worldwide Space Day celebration where visitors learned about the International Space Station, meteorites, Moon rocks, and the latest NASA/JPL programs.
OMNIMAX HIGHLIGHTS

The OMNIMAX Theater continued to dazzle fans of giant screen cinema with several new outstanding films.

Hubble told the story of an inspiring journey into space to perform important repairs and upgrades on the Hubble Space Telescope.

Journey to Mecca portrayed the amazing story of Ibn Battuta, the greatest explorer of the Old World, following his first pilgrimage from Tangier to Mecca in 1325.

Deep Sea took visitors on an immersive, underwater adventure deep below the ocean’s surface to witness never-before-seen, up-close encounters with a wide range of exotic underwater life.

FY10 also saw the return of the OMNIMAX Film Festival presenting visitors with 21 remarkable films, including some rarely played classics, all designed to make the most of the IMAX giant screen experience.

A LEADER IN COMMUNITY EVENTS

Special events continued to bring in new audiences and make connections within the community. OMsi’s popular monthly programs expanded their audiences and programming, with a Science Pub featuring physicist Neil DeGrasse Tyson drawing record crowds. OMsi After Dark and Teen Nights consistently reached nontraditional audiences while annual events such as the Agate and Mineral Show, Shell Show, and Reptile Show continued to be visitor favorites.

Reflecting OMsi’s commitment to sustainability, the museum hosted two look at alternative transportation, a sneak peak at the Nissan Leaf electric car and a chance to try a hydrogen fuel cell car. Additional FY10 event highlights included a special celebration for the USS Blueback’s 50th anniversary, OMsi’s Brain Fair, and a LEGO building challenge.

DEDICATION TO SUSTAINABILITY

In FY10, OMsi received a $2.3-million-dollar grant from the National Science Foundation (NSF) to help fund a $3.3-million-dollar project on renewable energy and sustainability education. The project, titled Sustainability: Promoting Sustainable Decision Making in Informal Education, will include a 1,500-square-foot, bilingual, permanent exhibit in OMsi’s Earth Science Hall, as well as outreach programs and events. OMsi’s partners in development of the sustainability project include the City of Portland Bureau of Planning and Sustainability, Metro Regional Government, Portland Community College, Verde, and the Coalition for a Livable Future.

OMsi also received a $421,549 grant from the National Aeronautics and Space Administration (NASA) for several projects designed to help further the museum’s energy and environment initiatives. Included is funding for program development utilizing NASA data for OMsi’s Science On a Sphere exhibit, and the purchase of two Magic Planets, a type of portable Science On a Sphere.

DISCOVER. INSPIRE. DREAM.

VIP events for our President’s Circle members and corporate partners were ever-popular, and our annual Gala drew more than 700 donors and friends for a night at the museum in celebration of Space: A Journey to Our Future.

## CORPORATE PARTNERS

Our corporate friends share OMSI’s vision of a creative, technologically literate community where science learning plays a role in contributing to everyone’s success—from research scientists to kindergarten teachers and from poets to pipe fitters. We salute the leadership and vision of the following group of businesses, large and small, that help make our work possible every day. (FY10 = June 1, 2009–May 31, 2010)

You guys are the best trip that I've ever been to. That really long bus ride was worth every minute!

Young Field Trip Attendee
OMSI depends on the generous contributions of volunteers. These are people in their teens and beyond who care deeply about OMSI’s mission and are willing to give their time and personal attention to nearly every aspect of the museum’s operations—from the labs to the administrative offices. They are the people who greet visitors and answer questions and whose willingness to share their love of science learning infuses everything we do. (FY10 = June 1, 2009–May 31, 2010)

THANK YOU to our dedicated, multitalented, inspiring volunteers who gave 103,815 hours of service to OMSI.

I’m encouraged to expand my own knowledge and gain teaching experiences by putting my own horizons. With OMSI a weekly part of my life, I feel better about myself and my place in the greater community. Learning is a task never finished.

Jim Hutchinson
Volunteer, Oregon Museum of Science and Industry
Our Mission

The Oregon Museum of Science and Industry (OMSI) is a scientific, educational, and cultural resource center dedicated to improving the public's understanding of science and technology. OMSI makes science exciting and relevant through exhibits, programs, and experiences that are presented in an entertaining and participatory fashion.
“OMSI IS A JEWEL AND DESERVES OUR SUPPORT.”

CLARIS POPPERT

CONSIDER THE POWER OF PLANNED GIVING.
