The Approach

Tracey the pencil dog and her crew of fun-loving friends guide visitors through a magical world in *Animationland*. Hands-on interactives reveal the secrets behind the art of animation, while big, bright environmentals create an immersive setting. Light tables for drawing and a variety of stop-motion stations allow visitors to explore how they too can use animation to tell their stories!
Creative Guidelines
Logotype: Color

For use on White or Grey Jr. colors

Wide

Tall

Note: White, Grey Jr., and dark purple are the only approved background colors.

For use when you need the logo to pop!

Wide - Plate

Tall - Plate

Note: the uppercase “I” changes color for better contrast on the purple background. Please use this version of the logo whenever using this background.

For use on White Background Only

Use this art when posting a character with the logo. This version of the logo does not have a “plate,” and cannot go on any color other than white.
Logotype: B&W

For when you can’t use color

Wide

Wide – Plate

Tall

Tall – Plate
Please Avoid

To ensure the quality, consistency, and integrity of the logo, there are things you can and cannot do with it. Here are some examples of what not to do.

Never change the color of the characters or add additional colors.

Never move or rotate the characters or any other unapproved orientation.

Never make the logo all one color unless it's black and white.

Never change the color of the plate to a light color or any other unapproved color.
The logo needs clear space in order to maintain legibility in every application. In this case, space equal to the height of the capital "A" is indicated by a grey box. The dotted line shows the area in which any other elements must not be placed.
Minimum Size

For minimum sized logos, please use the Tall Logotype. The minimum width for print applications is 1.25”, and the minimum width for digital applications is 80px at 72 dpi.

For print, the minimum width is 1.25”

For digital, the minimum width is 80px

Breaking down the art and science of animation with Animationland

Tracey the pencil dog and her crew guide visitors through the basics of turning a story into an animation at [Organization Name]'s newest exhibit.

[DATELINE] — The newest addition to [Organization Name] educational repertoire is an exhibit that seeks to educate visitors about the art and science of animation. Now open to the public, Animationland transports visitors of all ages to a fantastical land with a quirky cast of characters where inspiration is everywhere!

The exhibit focuses on the basics of the animation process using interactive features including a sketching studio, a sound effects booth and the opportunity to plan and star in a stop-motion production.

“Animationland is a vibrant, whimsical place where kids and adults can get lost in the creative process, even if they’ve never thought of themselves as artists,” said Catherine Diaz, exhibit business development manager at OMSI. “The exhibit provides visitors with the opportunity to experiment with animation, then walk away with the knowledge and skills to do it at home. It’s a DIY experience!”

Developed and produced by the Oregon Museum of Science and Industry (OMSI), Animationland offers a fully immersive, interactive exhibit where guests learn to incorporate animation skills into the creation process. This enables guests to understand the interplay that occurs between art and science and how they can apply those skills to tell their own stories in unique and dynamic ways.

“We want everyone to feel welcome and inspired to draw and animate their own creations,” said Cecilia Nguyen, exhibit developer at OMSI. “Animation is an extremely effective way to engage people with math and science, especially those who don’t see themselves as interested or motivated to learn in those areas.”
In order to create a fully immersive environment, OMSI collaborated with expert creative studio Jolby & Friends to develop original characters, illustrations, and animation.

“When we started to sketch our ideas for the cast of characters, we knew we wanted them to be simple enough for anyone to draw. Each character has a defining visual characteristic and an attitude that gives them meaning in Animationland,” said Colby Nichols, creative director and partner at Jolby & Friends. “When we were kids, we wanted to become artists and animators, so we put ourselves in that mindset and created a world in which we knew kids would want to play.”

Animationland is on view [duration of exhibit].

About OMSI
Founded in 1944, the Oregon Museum of Science and Industry (OMSI) is one of the nation’s leading science museums, a world-class tourist attraction, and an award-winning educational resource for the kid in each of us. OMSI operates the largest museum-based outdoor science education program in the country and provides traveling and community outreach programs that bring science learning opportunities to schools and community organizations in nearly every county in Oregon. OMSI is located at 1945 SE Water Avenue, Portland, OR 97214. For general information, call 503.797.4000 or visit omsi.edu. Connect with the museum on Facebook, Twitter, and Instagram.
