

Museum Education: Life Science Lab Summer Internship Position Description

POSITION SUMMARY:

Museum Education interns are in the halls and labs of OMSI where they facilitate hands-on science experiences and inspire museum guests to make amazing connections with science through activities, demonstrations, and informal interactions. Interns assist Museum Education staff in the regular presentation and development of the museum halls and labs.

This position is for the Life Science Lab and reports to the Life Sciences Coordinator. Visitors to the Life Science Lab explore concepts such as ecology, anatomy, animal biology and more. With living collections such as snakes, rats and insects, guests of the life science lab can view these animals in a safe learning environment. Also with activities such as microscope exploration, DNA extraction and owl pellet dissections, this lab offers facilitated hands-on learning of Biology.

EXPERIENCES THE INTERNSHIP WILL PROVIDE:

- Facilitating hands-on Biology activities and interactions with museum guests of all ages
- Animal care and animal handling
- Working in a collaborative environment with paid and unpaid staff of a variety of ages, experiences, and backgrounds
- Opportunities to develop individual or team projects including (but not limited to) creation of demonstrations, development of lab materials, or assisting with reserved lab classes

KNOWLEDGE/SKILLS/ABILITIES:

What we are looking for:

- Strong communication, customer service, and problem-solving skills.
- Self-directed and willing to take initiative.
- Desire and/or ability to present science process and content in an engaging way to a broad age range.
- Present a professional personal appearance.
- Must be dependable, punctual, and willing to commit to a schedule.
- Background or interest in Biology and/or Animal Sciences

Training you will receive:

- General informal science education philosophies and pedagogy
- Facilitation best practices, including how to facilitate intergenerational communication, frame questions, gauge and respond to guests' social and educational goals, and cultivate learner-driven investigations
- Culturally responsive facilitation strategies
- Museum safety and emergency response
- Engaging in life science demonstrations and activities
- Animal care and animal handling
- Lab specific maintenance and procedures

SCHEDULE:

- Schedule depends on needs of the lab, but will be regular and predictable week to week.
- Minimum of 20-24 hours per week for at least 12 weeks.
- Tues, Wed, TH, Fri or Sat

LEARNING OUTCOMES:

- Recognizing and promoting of science process skills
- Fostering learner-driven investigations

Museum Education: Life Science Lab Summer Internship Position Description

- Negotiating facilitator and visitor goals for optimal museum experience
- Supporting culturally responsive facilitation techniques
- Identifying benefits and disadvantages of using different types of objects and models in learning experiences
- Gaining knowledge of museum culture and practices
- Strengthen understanding of basic biology concepts
- Develop and improve science communication skills
