Tyrannosaurs - Meet the Family brings the latest tyrannosaur discoveries to life, overturning preconceptions about these ferocious predators. The exhibition explores the most feared and revered of all dinosaurs in new and different ways.
While the most famous is the mighty T. rex, tyrannosaurs came in all shapes and sizes and from all over the globe, and their history goes back more than 100 million years. New tyrannosaurs, like the crested Guanlong from China, are changing and challenging our understanding of the evolution of these iconic, well-loved dinosaurs.
The exhibition’s real and replica specimens are not only spectacular in scale and form, but also reveal some of the most significant discoveries in paleontology of the past decade. *Tyrannosaurs* offers visitors a look at rare and magnificent fossils, reconstructing the life-sized skeletons of these terrifying carnivores in unique ways.
Exhibit Features

- Real fossil bones from one of the first T.rex skeletons.
- Three full life-sized skeletons of a Daspletosaurus, Albertosaurus, and Lynthronax.
- A 30-ft tunnel where exhibit-goers can watch tyrannosaurs exploring modern-day Portland.
- A large-scale, multi-touch and multiplayer family tree gaming table.

*The augmented reality experience has been a crowd favorite.*
An augmented-reality experience where visitors can play with life-sized dinosaurs in the gallery.

Two tyrannosaur species discovered recently in China: *Dilong* and *Guanlong*.

Four never-before-toured *T. rex* fossils, including a partial upper jaw (with teeth), juvenile femur, pubic boot, and a fused nasal bone.

Overturning our preconceptions, the life-sized *Guanlong* diorama highlights the creature’s proto-feathers and moderate size - both newly discovered features of early tyrannosaurs.

Educational infographics help contextualize the diverse and long evolutionary story of tyrannosaurs.

Founded in 1944, the Oregon Museum of Science and Industry (OMSI) is one of the nation’s leading science museums and a trusted educational resource for communities throughout Oregon and the region. Through museum exhibitions, public programs, outdoor programs, traveling exhibitions, digital learning, and learning research and design, OMSI nourishes a lifelong love of science, curiosity and learning among its diverse audiences. Science learning at its heart.

Museum Information

Fall/Winter Museum Hours
Monday: Closed*
Tuesday–Friday: 9:30 am to 5:30 pm
Saturday: 9:30 am to 7 pm
Sunday: 9:30 am to 5:30 pm

Museum Admission

Adult (14+) $19.00
Senior (63+) $16.00
Youth (3–13) $14.00
Infant (under 3 years) Free

Ticket reservations required for all ages.

Buy tickets online at omsi.edu or at the front desk.
